

# WORK AT XSTREAM

– We are always on the lookout for sparkly, passionate people

## Cloud oriented DevOps Engineer

### Warsaw

**Join a company constantly looking to push the boundaries of new technology and work with the most innovative minds in the industry.**

#### About Xstream

Xstream develops software for managing Online Video Solutions, called MediaMaker. Our software is used by several major media companies and enterprises for managing video on multiple platforms, and is the foundation of several major Internet TV and VOD services in Scandinavia, Europe and US. Among our customers you'll find Disney, Fuhu, SES Platform Services, Canal Digital, SBS Discovery Media, Pathé and many more.

Our HQ office is located in central Copenhagen, and we have a Development center in Poland, Warsaw, as well as a North American sales office.

#### You must have the following qualifications and experience in:

- Expert in large AWS environments (auto scaling, auto deployment, load balancing)
- Python / Boto AWS scripting
- Puppet, Vagrant, Docker, Jenkins

- Expert in administration of Linux servers (Centos, Debian, Ubuntu)
- SQL (MySQL) - clustered systems
- Virtualization (Ovirt, Proxmox, Vmware)
- ElasticSearch, Logentries, Kibana, Logstash
- Monitoring tools: CloudWatch, Zabbix
- Gerrit / GIT/ Review Board
- PHP basics
- Communication and presentation skills for customer support
- Stress resistance, perseverance, accuracy and customer focus
- Excellent command of English language
- Ability to handle weekly on-call duties after office hours (agreed and scheduled in advance)

#### Nice to have:

- Good knowledge of another programming language like: java
- Knowledge on :
  - media streaming,
  - drm services (widevine, playready, ...),
  - media encoding (ffmpeg, avconv, handbrake, ...)
- RabbitMQ
- Administration of Windows servers

#### Your key responsibilities:

- Providing 3rd line of support for production environment and internal organization
- Handling of Incidents/Service Requests from reception until closure and assurance of the time restoration within SLA

- Implementation of agreed and approved changes on production environment
- Ability to lead and act based on identified systems failures in order to provide stable platform.
- Creating/updating of Knowledge Base records and both lead and act on finding resolutions for the incidents/problems
- Creating/Updating technical documentation
- Close interaction with other technicians within the team, vendors support and the customer' s technical staff
- Supporting Problem Management with root cause analysis of incidents related to customer complaints and implementation of corrective actions.

#### Xstream offers you:

- Inspiring work within multicultural experienced team
- Competitive salary (B2B or employment contract)
- Technical trainings and certificates
- Sport & recreation package (Benefit Multisport card)
- Cafeteria system (Multibenefit)
- Prepaid lunch card
- Private medical insurance for you and your family
- Free English lessons
- Extra/additional life insurance
- Social events including: daily fruits, monthly company beer, Xmas party, team-bonding event, project events etc.
- Inspiring and functional working space including game/chill-out room
- Technical library

- Work in the office localized few steps from the metro station
- Great opportunities of professional development
- A young and international workplace with good colleagues who emphasize an informal atmosphere with room for humor, and where it is fun and exciting to go to work.
